Pans

Your space-saving solution
for small machines

The construction of the P Series is an integral one piece PVC skin and foam fitted to a rigid seat pan. Ideal for outdoor applications the P Series contoured surface grooves channel any surface water towards drainage holes at the rear of the pan.

All pans can be used as static seats with or without sliderails and can also be fitted to XL2, XH2, 11 and Air 15 suspension units.

P1 Pan

Space-saving and cost-effective, narrow pan seat. Ideal for vineyard tractors. Optional extra – backrest extension.

P2 Pan

Our most popular and versatile one-piece pan seat – can be used in a wide variety of applications. Optional extras – lap belt and backrest extension.

P4 Pan

A higher back, one-piece pan seat which allows better mid-back support.

P6 Pan

The new P6 is a two-piece mid-back seat pan with moulded vacuum-formed skin & foam. It is ideal for small tractors, small construction machines and ride on mowers.

Optional Extras – lap belt, backrest extension and armrests.
